We encourage families to also submit a scholarship application to identify if their child has been involved in any extracurricular and school-based programs.

Brisbane Bayside State College offers scholarships in academic studies, sports, and arts and the community.

BEAP - BAYSIDE’S ACADEMIC ENRICHMENT PROGRAM

The Bayside Enrichment Academic Program is designed to develop within our students the skills and ability to become life-long learners, with the capacity to become active global citizens who:

- are knowledgeable people with deep understanding of the world around them,
- use creativity, logic and/or reasoning to solve problems,
- are effective communicators,
- possess an inquisitive mind, and
- are reflective and self-directed learners.

BEAP PHILOSOPHY

Brisbane Bayside State College offers academic enrichment programs for students who excel in English/Humanities and Mathematics/Science from Years 7 through 9.

This program enables bright, highly motivated junior school students to be challenged, inspired and encouraged by both their peers and teachers to ‘Ignite their Spark’ and maximise their learning potential with a range of learning experiences that are designed to develop, accelerate and extend knowledge acquisition in these areas.

OPPORTUNITIES

Students enrolled in this program are encouraged to participate in additional learning experiences designed to foster their development, creativity and higher order thinking capabilities. This includes external competitions, Queensland Academies subjects and extra-curricular enrichment activities.

RICH TASKS:

In the program, our students will complete higher order thinking enrichment tasks in addition to their compulsory curriculum. The aim of these tasks is to ‘Ignite the Spark’ of our students by challenging and inspiring them, whilst also allowing them to demonstrate core learnings in new, innovative and contextual ways. The duration, degree of difficulty and timelines will differ according to their year level and subject area.

APPLICATION PROCESS:

- Families are to complete an electronic expression of interest form and scan the required documentation, emailing their application by the end of Semester 1
- Primary schools will also be encouraged to identify suitable students
- Contact will be made to let families know if their student is successful or unsuccessful

SELECTION PROCESSES:

Panelists will assess a student’s suitability for the program based upon the following:

- Academic history: It is an expectation that students will have A and B results on their most recent school reports within the core learning areas - English, Humanities, Mathematics and Science.
- Literacy and numeracy skills: Demonstrated proficiency and aptitude in these areas through NAPLAN results.
- Behaviours of learning and commitment to educational development: Students should have demonstrated behaviour which will support their achievement of success within an enrichment program. Report card comments around effort and behaviour will support such evaluations.
- Attendance history.
- N.B. Contact may also be made with the primary school to collect further data regarding an applicant’s aptitude, learning styles and academic history.

BYOx:

N.B. Students enrolled in Signature Programs including BEAP at Brisbane Bayside State College are required to participate in the ‘bring your own device’ (BYOx) program.
